## **Colloquium**

**The Essential G.I. Taylor**

**K.R. Sreenivasan**

**New York University**

**Abstract:** In the obituary note on G.I. Taylor, Sir Brian Pippard wrote as follows: "Sir Geoffrey Ingram Taylor was one of the great scientists of our time and perhaps the last representative of that school of thought that includes Kelvin, Maxwell and Rayleigh, who were physicists, applied mathematicians and engineers --- the distinction is irrelevant because their skills knew no such boundaries." This talk, which will be partly historical and partly scientific, is an amplification of that remark. It draws heavily from the biographical article authored recently by the speaker.

**Date: Saturday, December 22<sup>nd</sup> 2012**

**Time: 4:00PM (Tea/Coffee at 03:30PM)**

**Venue: Conference Hall, TCIS**

***All are cordially invited***
