From my heart

Dear friends,

What drives us to work towards transforming India by increasing farmer incomes. I would like to enumerate 4 principles of our working strategy :

- Scale: India has 6.64 lakh villages. We need to work at scale. Currently we are working in 10 districts of Maharashtra & 10 in Madhya Pradesh, meaning around 20,000 villages.
- Speed: Time is really short, we are working at an unprecedented speed already, but we need to accelerate.
- Focus: There are thousands of things to do, but we have maintained our focus on increasing farmer incomes
- Impact: Rural Economy and Environment are the primary targets of impact

We look forward to your support in our mission!
INDIA CAN WAIT NO MORE

Love,
Mayank

Soil Testing Training

We have recently brought soil testing mini labs and have taken one step ahead in the direction towards sustainable agriculture. For which technical experts from Harvesto and Bhumi Prayogshala visited Parli and Palghar offices, specifically for training the Global Parli team. In which, they gave detailed information on how to test the soil and what materials are used in it. They also provided detailed guidance on how to manage and prepare its report and explain it in simplicity to farmers and other stakeholders

Jal Zindabad Abhiyan

Our plan to transform India by a positive, zindabad movement is catching momentum. It's a people movement that has multiplied farmer incomes, thereby reducing suicides, hunger and poverty, dramatically

As we shared this year's ambitious plans, thousands of farmers joined our meetings in Nanded and Parli. The energy was electrifying, as they listened to this year's plans of Marathwada that will transform their lives even more.

Work on integrated village development has commenced. Started removal of fast spreading bawal, repairing & desilting lakes and check dams, recharging borewells, clearing gauchar lands and more.

Kisan Krishi Pradashan

Our team had the opportunity to spread the word about our movement to farmers and other relevant stakeholders.

Gevrai Taluka Agriculture Officer Madam and Head of EGS Department of Gevrai Taluka Tehsil Office Bhosle Sir were present at the stall of Global Parli Horticulture Project 2022.

140 farmers from the area registered and expressed their interest in orchard cultivation and learned in detail about the Global Parli Orchard Plantation initiative.

Dahanu farmer's fair

Recently in the tehsil of Dahanu, a farmer's fair was organized. Where farmers from different localities were present to explore more about agricultural techniques.

We have also put our stall of Global pari and our Palghar team introduced horticulture to farmers and explained the Global Pari model of increasing farmer income.

Capacity building sessions

On 26th March, the women of Mahila Bachat Group in Bhoirgaon village of Bhiwandi Taluka were trained about the initiatives by Global Vikas Trust. Our team also gave guidance on horticulture and floriculture plantation with importance of soil conservation. Lack of cultivable land, challenges with water in villages and many other issues were raised by the women. GVT representatives Dipti Kadam, Kalpesh Sir, Manoj Sir encouraged all the women present to convey the mission of our organization to regional farmers about water management and cultivation. Attendees thanked the representatives of the organization for attending and providing information. MSW student Sakshi Joshi assisted in organizing the women's meeting.

Internal staff visit and training

We believe in the capacity building of not only farmers but also our staff members. Recently we have introduced new crop - Sericulture. To mainly study the economics and profitability of the farmers, our farmer support team from Mumbai visited Parli office and had a on dis

B.C Jindal Group visits Parli

Representatives from B.C Jindal Foundation visited Global Parli Farmers in Marathwada. This visit covered many villages across Nanded, Parbhani, Beed, Osmanabad, and Hingoli.

The representative Mr. Kumar Gaurav expressed that "Thank You for all the arrangements. The team is very good and really working hard on the ground. Really Inspired and motivated after meeting the team and good to see that farmers are also taking positive methods in farming and are well informed."

SPJIMR Interns join Global Parli

We welcome our new summer interns, students of SPJIMR Mumbai who visited our operational units and villages of Palghar & Parli to have a practical learning experience of our work with farmers. Based on their observations, they have been researching to make recommendations on optimizing our systems and processes with the best use of technology, management, and innovation under the guidance of Mayank Gandhi and the regional teams.

Congratulations to Simrat Singh Talwar, Bhavyae Singhal & Swapnil Singh.

Farmer's Day Out

Farmers from Burhanpur along with the Global Parli team had a training and exposure visit to learn more about the techniques of plantation in Rise and Shine Biotech, Pune. This exposure visit started at the Banana Tissue Culture Lab, followed by a visit to the primary and secondary hardening poly-house.

Later they visited floriculture and strawberry cultivation to learn more about the advancement in the new technologies for the horticulture practices. There was conversation regarding the quality of banana tissue cultured plants and banana cultivation techniques between the farmers and the team of experts from the lab.

Kisan Fair in Pune

The Pune KISAN Fair aims to unite India's agricultural community on a single platform.

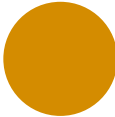

It is India's only event of its kind, bringing together agri-professionals, policymakers, like-minded individuals, government officials, and the media from all over the country to discuss the who's who of the Indian agriculture sector.

Our farmers also got a chance to visit the fair and experience new ideas, technologies, and innovative concepts.

THANK YOU
