Standard Operating Procedure
## Of
Solo Terminal Profile Setting

Scope – This profile is crated for Solo Users to get configure their terminal with specific users. This is mandatory to select Solo Profile only for Solo users. This is give good speed in rate refresh. There are multiple steps in setting which is mentioned below so that user can easily manage this setting from their side without any IT support.

Audience – This is application for user who are using their terminal over the broadband connection / connectivity.
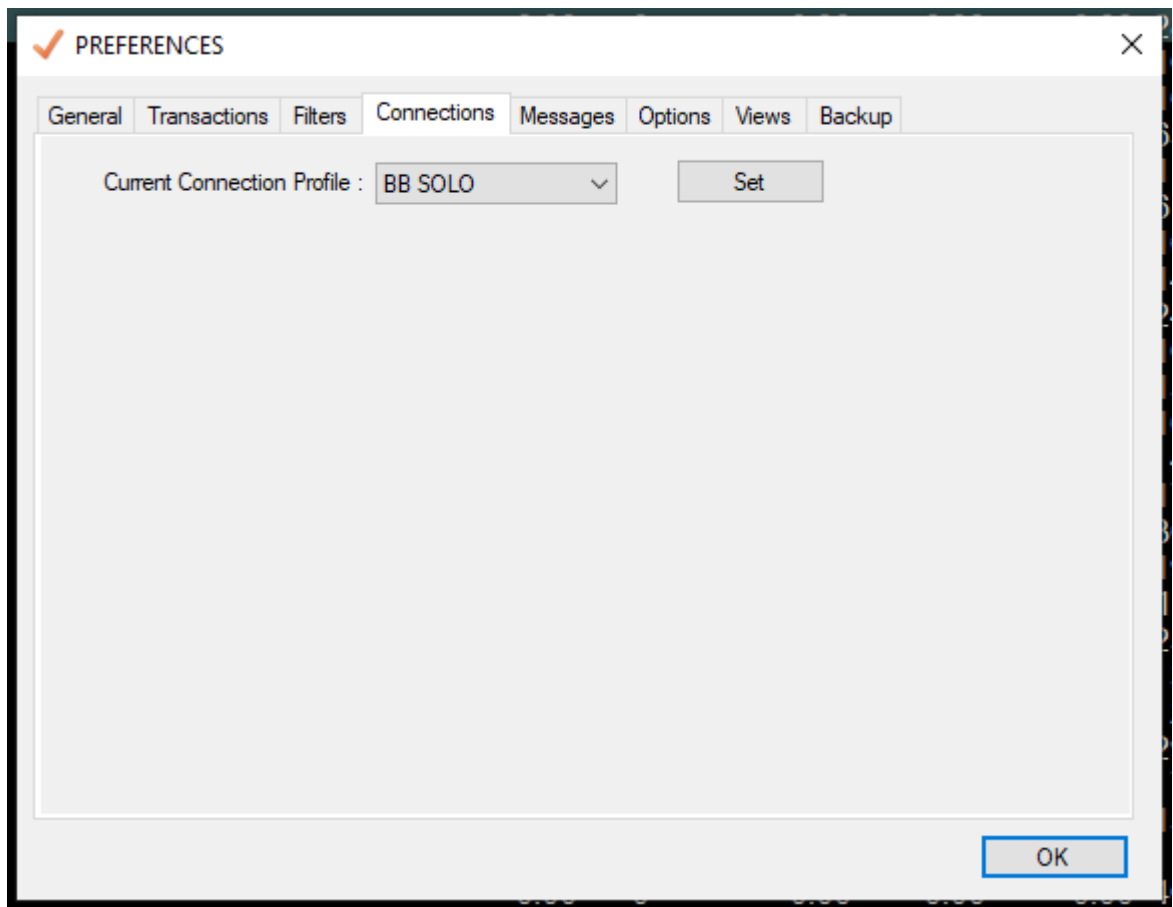

1. Login Moneymaker Solo with user credentials.

2. Once Logged in, Go to Tools>>Preferences>>Connections.

3. Select <mark>BB SOLO</mark> and click on Set Button then Click on OK. (For Broadband Internet connection).

4. After OK, Re-login is mandatory for terminal application for change to be affected.

Note: Incase the settings are not completed in accordance to SOP, the application's rate refresh may not work properly.
