Garbage Bags

Today as we live in an environmentally friendly world, we need to think of more than one way to keep the environment healthy and protective. All of us need a clean environment to live in and a healthy neighborhood, free from litter on the streets or in the building compound. Shalimar Pack fulfills this very need with its range of Garbage Bags.

Our Garbage Bags are designed to spread the word of hygiene and cleanliness by easy disposal of waste. Our bags offer great flexibility, convenience and ensure a high degree of hygiene, whether at home or in office.

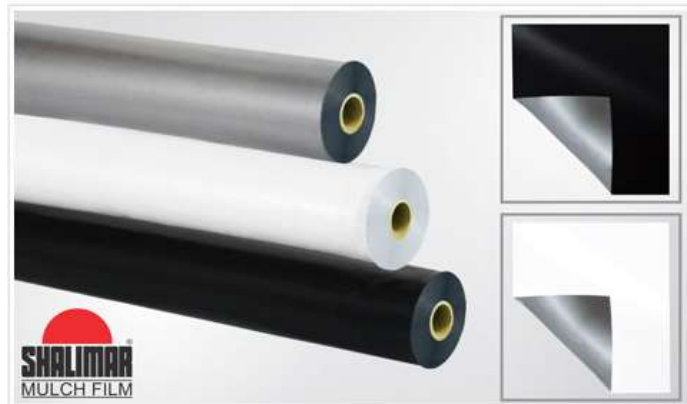

Our garbage bags come in roll form and in convenient packs of 30 or 15 bags. Each bag has a unique detachable tie-tape to tie the bags after use and for easy disposal. They are tough, thanks to a special type of star seal at the bottom. It comes with a simple perforation technology for quickly separating the bags from the roll.

Mulch Films

Shalimar puts years of experience to work for agriculture by providing best quality multi layered mulch films. Mulching has become the core technology in vegetables, fruits, flowers and foodgrains production as the quality of the crop is far more superior and yield is faster. Our mulch films are easy to apply and have the strength and stretch to ensure a tight fit over raised beds.

Mulching is the process of covering the soil/ground to make more favourable conditions for plant growth, development and efficient crop production. The end result of mulching is a much improved crop yield with the following advantages:

Mulch Films

Enhanced crop yield, quality and quantity.

Fast crop development and early harvest.

Water erosion is completely averted.

Maintains soil structure.

Prevents direct evaporation of moisture from the soil.

Protects roots from climatic extremes.

Protects against leaching of fertilizers.

Excellent weed control.

Repels insects due to its reflecting property.

Helps in water conservation.

They are usually manufactured in two colours silver/black & white/black. It helps in reflecting the sun light to the plant from the bottom, due to which more light is availed by the plants thus enhancing the photosynthesis activity. These films are available in different sizes as per requirement.

Tarpaulin

One name that has gained wide popularity with total protection from rain is Shalimar Tarpaulin. Shalimar is the brand leader in HDPE tarpaulin and is the most wanted brand in India for domestic, commercial as well as industrial use. The very famous ad slogan of Shalimar Tarpaulin- " Baarish ki dhal, Shalimar Tirpal" sums it up for its durability, consistency and reliability.

Shade Nets

Experience the power of shade with Shade nets from Shalimar which offer protection from sunlight and different harsh surrounding conditions. Made from Virgin HDPE and added UV stabilizers, these Shade nets are extremely durable and very long lasting.

With multiple protective features Shalimar Shade nets find extensive usage in Agriculture, horticulture, floriculture, Construction sites and other general purpose shading. Also widely use for making pandals in parties and functions.

Our Shade nets are offered in various sizes and colours with Shade percentages varying from 30% to 90%

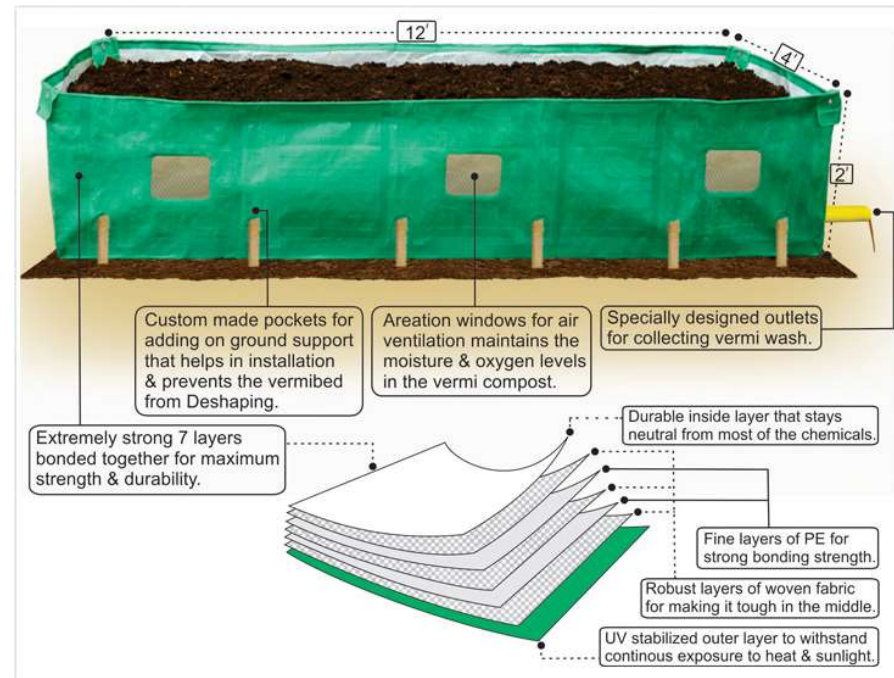

Vermi Bed

Vermi beds from the house of Shalimar is a great innovation and is widely used for organic farming. The vermi compost made from our vermi bed makes the soil & crop completely free from chemicals and other harmful substances as compared to chemical fertilizers. It also enriches the soil and improves its fertility giving the farmer better yield of crop in a very eco friendly way.

Our vermi bed is made of seven layers bonded together, its light in weight hence very easy to install but at the same time its strong and durable. It can be assembled anywhere, can be relocated and also can be reused several times.

Our high quality UV stabilizers protect the vermi bed from continues exposure to strong heat and sunlight preventing it from degrading or deshaping, thus increasing the life of the Vermi bed.

The Aeration net windows provided for maximum air ventilation maintains a proper balance of oxygen & moisture that helps keeping a controlled environment for healthier, faster and the best quality vermi compost.
